

SF Punter *chicory*

don't take a punt on any old chicory

General fit: SF Punter is a deep rooted perennial herb providing outstanding summer productivity and feed quality. It has high mineral uptake and is extremely persistent.

It provides a high energy forage with proven animal health benefits and increased animal production at a time of year when pasture quality is low.

Being more winter active than some varieties, SF Punter can be sown at any time when there is adequate moisture for good germination and establishment.

Australian release: 2006

Sowing rate: sole species; 1-4kg/ha
In a mix; 1-2 kg/ha

Livestock suitability: Dairy, beef and sheep

FEATURES	BENEFITS
<ul style="list-style-type: none"> • Excellent quality feed 	<ul style="list-style-type: none"> • High animal intake for increased meat and milk production • Enables high mineral uptake for improved livestock health
<ul style="list-style-type: none"> • Good winter activity 	<ul style="list-style-type: none"> • Better establishment and year round feed • Ideal companion species to pastures mixes
<ul style="list-style-type: none"> • Persistent medium-term option 	<ul style="list-style-type: none"> • Suited to mixes for 3-5 years. • Can regenerate from seed to thicken up in sward
